About us

Our success is based on great strategy...

EXFUNDS.com is a platform launched by EX FDS LTD based in London, United Kingdom. The EX FDS company was established by joining forces of extremely talented people with extensive experience in financial markets, especially those related to the latest technologies. The premise of the platform is to enable our users to be part of our investment strategies and earn with us. To simplify this process as much as possible, we have created two investment plans that give profits that the best day traders can envy. The user does not need to have any knowledge about investments, the stock market or the cryptocurrency market. Our team takes care of everything and the user only focuses on managing his own profits.

The Team

The Platform

EXFUNDS.com

Easy-to-Use

The EXFUNDS.com platform has a very intuitive user interface. To join the group of our users, all you need is a quick registration, in which you must provide a valid email address, full name and create a username and password.

After registration, you can immediately log in to your account and go to the dashboard. The service menu is very easy to use, in the dashboard you will find all the necessary information about your account status, you can edit it, manage your investment plans, referral program, download promotional materials or contact support.

The website is fully responsive and you can use it both on your computer and on mobile devices such as smartphones and tablets.

Be sure to read the terms of use before registering. Our platform is available to anyone over 18 years of age. We have no restrictions on the country or region you want to register from. We are open to investors from all over the world.

The Background

Our business is based on extensive trading experience

Our mission is to give as many people as possible the possibility of using modern earning money. Earning in which our experienced traders will help, or actually they will do it for you. Building an investor community by accumulating as much capital as possible in one investment portfolio is favorable in every market and in every transaction. To put it simply: the greater the capital, the greater, easier and more secure the profits. This is what gives us an advantage over people who trade alone or try their hand at stock exchanges using, for example, financial leverage. Our specialists do not make risky transactions because they have sufficient capital from both the company's founders and investors to have a very strong position on the traditional or cryptocurrency exchange.

The pillars of our activity are: Traditional trading, manual buy / sell using the most famous brokers. Short-term SWAP and options, equity derivatives, FOREX market, currency pairs, virtual commodity exchange. Of course, a large part of our activity is occupied by the cryptocurrency market and all related operations. Our company has active bots trading 24 hours a day, operating on thousands of microtransactions every day. Our traders perform active arbitrage and active trading on the largest exchanges such as Binance, OKEX, Kraken, KuCoin, Bitfinex. We also deal with active short-term investments in emerging tokens in the early stages of growth.

Referral Program

Our referral program is an amazing profit opportunity, even without your own investment!

For actively recommending our platform to your friends or other random people, you will be rewarded with a commission.

You do not need to have your own deposit to start earning in the referral system. All you need to do is register an account and in your panel you will see a reference link that your referral must use when registering an account. We pay a commission of up to three tiers of 5% + 2% + 1% on the value of all deposits of people in your structure. You will also receive a commission on each future reinvestment of your referrals. There are no limits to the number of people in your structure or the amount of your earnings. You can withdraw your commissions immediately to your private wallet.

If you own a website, blog, community groups, or you just have social media accounts, simply download our advertising materials, add your referral link, advertising banners or your own reviews and encourage people to use our platform. You can record videos, post ads or share information via messengers. It all depends on your creativity.
